2B 1A (A - Chemistry)

💻 Projects

E-Commerce Web App(Ongoing)
2nd year group project

- A web based project that allows people to buy and sell physical goods and products over the internet rather than going to the shopping mall. Through this e-commerce website, any business can process orders, accept payments, and provide customer service.

- **Role:** Full-stack developer

- **Technologies:** React, my SQL, Go lang, CSS, Bootsrap

github.com/Thilina1999/Group__Project.git

Smart Wheel Chair
1st year group project

- This Project is to build up a product in order to assist disabled people. After a research study we finalized an idea to make a smart wheelchair with the ability to control using both buttons and a smartphone app.

- **Technologies:** AVR micro controller programming, Micro C.

Salon Management System(Ongoing)

- A web and mobile-based project that allows people to book particular time slots over the internet rather than going to the salon. This saloon has a management system that includes certain roles as super admin, cashier, and barber. Through this management system, the system can accept payments and provide customer service.

- **Role:** Full-stack developer

- **Technologies:** React, Node JS, Express JS, Mongo DB (MERN)
